

sdmay23-12: Unified Butterfly Recorder - Reboot

Week 14 Report

November 19 - December 4

Team MembersTimothy Ellis — *Client Communication*Grace Wigen — *Organizer*Anthony Mazzie — *Cloud Expert, lead developer*Zach Wingert — *Developer*Ryan McNally — *Developer*Jeremy Marchesani — *Developer***Summary of Progress this Report**

We spent a lot of our time this week working on the final design document. This helped us to think through any last potential problems or things left unplanned out. We also finished our final faculty presentation. We gave our presentation to the 491 lectures on 12/1. The presentation went well and we were given some helpful feedback on things to improve on, such as talk more about things we have already accomplished.

Pending Issues

We don't have any major pending issues at the moment. We did just hear that it now might be possible to be able to send our surveys to PollardBase. We now have a contact of someone we can work with to see if this is going to be a possibility by the time, we start putting major hours into coding this.

Plans for Upcoming Reporting Period

Our plan going forward is to determine the backend tables and columns for the database. We also will tighten up our presentation even more and continue to practice it so we are ready for the faculty panel.

Individual Contributions

Team Member	Contribution	Weekly Hours	Total Hours
Timothy Ellis	Communicated questions to client before weekly meeting, participated in weekly meeting, and helped with the faculty presentation	10	0
Grace Wigen	Attended weekly meeting, took meeting minutes, and helped work on the faculty presentation	10	
Anthony Mazzie	continued to improve existing application, and helped work on the faculty presentation	20	0
Zach Wingert	Attended meeting and helped work on the faculty presentation	10	

Ryan McNally	Attended meeting and helped work on the faculty presentation	10	0
Jeremy Marchesani	Attended meeting and helped work on the faculty presentation	10	

Gitlab Activity Summary

Nothing to report.
